## Required information on electric infrared heating panels

Zipris S Sleek (900 watts)

| Item                                 | Symbol             | Value | Unit |
|--------------------------------------|--------------------|-------|------|
| Heat output                          |                    |       |      |
| Nominal heat<br>output               | P <sub>nom</sub>   | 0,9   | kW   |
| Minimum heat<br>output (indicative)  | P <sub>min</sub>   | N/A   | kW   |
| Maximum<br>continuous heat<br>output | P <sub>max,c</sub> | 0,9   | kW   |
| Auxiliary power o                    | consump            | tion  |      |
| At nominal heat<br>output            | el <sub>max</sub>  | 0,913 | kW   |
| At minimum heat                      | el <sub>min</sub>  | N/A   | kW   |

The information given refers only to the heating panel.

el <sub>SB</sub>

N/A

kW

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose one of our electronic thermostats for this heating element, e.g. the VASNER VFTB thermostat set, or use an existing system that meets these criteria.

| Item   | Unit   |  |  |
|--|--|--|--|
| Only for electric storage heaters:<br>Type of regulation of the heat supply<br>(please select one option)  |  |  |  |
| Manual control of the<br>heat supply<br>via integrated thermostat  | N/A  |  |  |
| Manual control of the<br>heat supply<br>with feedback of the room and /<br>or outdoor temperature  | N/A  |  |  |
| Electronic control of the<br>heat supply<br>with feedback of the room and /<br>or outdoor temperature  | N/A  |  |  |
| Fan-assisted heat output   | N/A  |  |  |
| Type of heat output<br>/ room temperature control  |  |  |  |
