VASNER

Required information on electric infrared heating panels

Model:

Zipris S Timber with real wood veneer frame (400 watts)

Item	Symbol	Value	Unit	
Heat output				
Nominal heat output	P _{nom}	0,4	kW	
Minimum heat output (indicative)	P _{min}	N/A	kW	
Maximum continuous heat output	P _{max,c}	0,4	kW	
Auxiliary power consumption				
At nominal heat output	el _{max}	0,422	kW	

The information given refers only to the heating
panel.

el _{min}

el _{SB}

N/A

kW

kW

At minimum heat

In standby mode

output

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose one of our electronic thermostats for this heating element, e.g. the VASNER VFTB thermostat set, or use an existing system that meets these criteria.
