VASNER

Required information on electric infrared heating panels

Model: Konvi RX (1200 watts)

Item	Symbol	Value	Unit
Heat output			
Nominal heat output	P _{nom}	1,2	kW
Minimum heat output (indicative)	P _{min}	N/A	kW
Maximum continuous heat output	P _{max,c}	1,2	kW
Auxiliary power o	consump	tion	
At nominal heat output	el _{max}	1,212	kW
At minimum heat	el _{min}	N/A	kW

The information given refers only to the heating panel.

el _{SB}

N/A

kW

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose the VASNER RX radio thermostat transmitter for this heating element or use another system that meets these criteria.

Type of regulation of the heat supply N/A (please select one option) N/A Manual control of the neat supply N/A Via integrated thermostat N/A Manual control of the neat supply N/A via integrated thermostat N/A Vanual control of the neat supply N/A or outdoor temperature N/A Electronic control of the neat supply N/A or outdoor temperature N/A Fan-assisted heat output N/A Type of heat output N/A / room temperature control YES For oom temperature control Single-stage heat output, no room temperature control (please select one option) NO Single-stage heat output, no room temperature control NO Goom temperature control NO Room temperature control NO Room temperature control NO adjustable NO Steps, no NO coom temperature control NO Room temperature control NO adjustable NO Goom temperature control NO	Item	Unit
