VASNER

Model:

Required information on electric infrared heating panels

Mellux Slim (190 watts)

Item	Symbol	Value	Unit
Heat output			
Nominal heat output	P _{nom}	0,19	kW
Minimum heat output (indicative)	P _{min}	N/A	kW
Maximum continuous heat output	P _{max,c}	0,19	kW
Auxiliary power	consump	tion	
At nominal heat output	el _{max}	0,192	kW
At minimum heat output	el _{min}	N/A	kW
In standby mode	el _{sb}	N/A	kW

The information given refers only to the heating panel.

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose one of our electronic thermostats for this heating element, e.g. the VASNER VFTB thermostat set, or use an existing system that meets these criteria.
