## VASNER

## Required information on electric infrared heating panels

Model: Citara M RX (1100 watts)

Item	Symbol	Value	Unit		
Heat output					
Nominal heat output	P <sub>nom</sub>	1,1	kW		
Minimum heat output (indicative)	P <sub>min</sub>	N/A	kW		
Maximum continuous heat output	P <sub>max,c</sub>	1,1	kW		
Auxiliary power consumption					
At nominal heat output	el <sub>max</sub>	1,184	kW		

The information giv	/en refers	only to the	heating

el <sub>min</sub>

el <sub>SB</sub>

kW

At minimum heat

In standby mode

output

The information given refers only to the heating panel.

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose the VASNER RX radio thermostat transmitter for this heating element or use another system that meets these criteria.

Type of regulation of the heat supply   N/A     Manual control of the heat supply   N/A     Produdoor temperature   N/A     Electronic control of the neat supply   N/A     Produdoor temperature   N/A     Fan-assisted heat output   N/A     Image: Stage heat output, here control   YES     Por out temperature control   NO     Single-stage heat output, here control   YES     No or more manually adjustable   NO     Steps, no   NO     No mechanical thermostat   NO     With electronic   NO     No metemperature control   NO     Steps, no   NO     Soom temperature control   NO     Mith electronic   NO     Soom temperature control   NO     Steps, no   NO     Soom temperature co	Item	Unit
