## **VASNER**

## Required information on electric infrared heating panels

Model: Konvi VE black (900 watts)

Item	Symbol	Value	Unit
Heat output			
Nominal heat output	P <sub>nom</sub>	0,9	kW
Minimum heat output (indicative)	P <sub>min</sub>	N/A	kW
Maximum continuous heat output	P <sub>max,c</sub>	0,9	kW
Auxiliary power of	consump	tion	
At nominal heat output	el <sub>max</sub>	0,913	kW
At minimum heat output	el <sub>min</sub>	N/A	kW
In standby mode	el <sub>SB</sub>	N/A	kW

The information given refers only to the heating panel.

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose one of our electronic thermostats for this heating element, e.g. the VASNER VFTB thermostat set, or use an existing system that meets these criteria.

via integrated thermostat  Manual control of the heat supply with feedback of the room and / or outdoor temperature Electronic control of the heat supply with feedback of the room and / or outdoor temperature	Item	Unit
Manual control of the heat supply via integrated thermostat  Manual control of the heat supply with feedback of the room and / or outdoor temperature  Electronic control of the heat supply with feedback of the room and / or outdoor temperature  Electronic control of the heat supply with feedback of the room and / or outdoor temperature  Fan-assisted heat output  / room temperature control  (please select one option)  Single-stage heat output, no room temperature control  Two or more manually adjustable steps, no room temperature control  Room temperature control via mechanical thermostat  With electronic room temperature control  Electronic room temperature control  Electronic room temperature control  Electronic room temperature control  Cond time-of-day control  Electronic room temperature control and time-of-day control  Electronic room temperature control ond weekday regulation  Other control options (multiple answers possible)  Room temperature control with occupancy detection  Room temperature control with open window detection	,
