VASNER

Required information on electric infrared heating panels

Model:

Zipris S Timber with real wood veneer frame (320 watts)

Item	Symbol	Value	Unit	
Heat output				
Nominal heat output	P _{nom}	0,32	kW	
Minimum heat output (indicative)	P _{min}	N/A	kW	
Maximum continuous heat output	P _{max,c}	0,32	kW	
Auxiliary power consumption				
At nominal heat output	el _{max}	0,323	kW	

The information given refers only to the heating
panel.

el _{min}

kW

At minimum heat

In standby mode

output

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose one of our electronic thermostats for this heating element, e.g. the VASNER VFTB thermostat set, or use an existing system that meets these criteria.

Only for electric storage heaters: Type of regulation of the heat supply (please select one option) N/A Manual control of the heat supply N/A Via integrated thermostat N/A Manual control of the heat supply N/A Via integrated thermostat N/A Manual control of the heat supply N/A Via integrated thermostat N/A Manual control of the heat supply N/A Via integrated the room and / or outdoor temperature N/A Electronic control of the heat supply N/A with feedback of the room and / or outdoor temperature N/A Fan-assisted heat output N/A / room temperature control (please select one option) YES Single-stage heat output, no room temperature control NO adjustable NO steps, no NO room temperature control NO Room temperature control NO Electronic NO room temperature control NO with feedback of the room ont NO adjustable NO teps, no NO room temperature control NO <th>Item</th> <th>Unit</th>	Item	Unit
