Required information on electric infrared heating panels

Model:

Zipris S with aluminium frame (600 watts)

Item	Symbol	Value	Unit
Heat output			
Nominal heat output	P _{nom}	0,6	kW
Minimum heat output (indicative)	P _{min}	N/A	kW
Maximum continuous heat output	P _{max,c}	0,6	kW
Auxiliary power o	consump	tion	
At nominal heat output	el _{max}	0,614	kW

The information given refers only to the heating panel.

output

According to EU Regulation (EU) 2015/1188, electric heaters must be controlled with an electronic room temperature controller (thermostat) which fulfils the criteria of weekday control and window-open-detection or e.g. adaptive control of the start of heating, which are listed here in full.

For compliant operation, please choose one of our electronic thermostats for this heating element, e.g. the VASNER VFTB thermostat set, or use an existing system that meets these criteria.

Item	Unit		
Only for electric storage heaters: Type of regulation of the heat supply (please select one option)			
Manual control of the	1		
heat supply	N/A		
via integrated thermostat			
Manual control of the			
heat supply	N/A		
with feedback of the room and /			
or outdoor temperature			
Electronic control of the			
heat supply	N/A		
with feedback of the room and /			
or outdoor temperature			
Fan-assisted heat output	N/A		
Type of heat output / room temperature control (please select one option)			
Single-stage heat output,	1		
no room temperature control	YES
